## **TMS77 Tool Review**

I purchased a set and received it UPS today. Wow! I have been a mechanic for 35 years and the last 28 at Doughertyautomotive.com I am used to buying tools off the tool trucks. Primarily Snap on and then Mac Tools. A Torx set from t15 to t55 from Snap On is \$259 plus Pa 6% Tax. Hard to believe the value of this set. I haven't used them yet, however, I can tell they are quality from the weight, feel and finish. The case is also very nice with real hinged latches and handle. I have been eyeballing the socket rails you sell. They look extremely nice.

Happy Holidays.
