

To whom it may concern,
My name is Cole Rush I am a Harley-Davidson mechanic. I purchased your VHC77 set last year and I must say it was been an absolute blessing having it. This kit is used on a daily basis and I can't think of never having it now. That being said I made a critical error today and lost my 5/32 hex bit today on a customer's motorcycle...I spent a good portion of the day trying to locate it and to no avail... Customer left with his motorcycle and sadly my bit along with it. I was curious if you guys were able to sell the bits individually? The person that sold me the kit was our local MAC tools dealer, but I wanted to contact you directly at first to see. Thanks for taking time out of your day to read this and getting back with me.

Sincerely,
Cole Rush

P.S. Again one of the best purchases I have ever made!
